

For Immediate Release

February 6, 2009

New Product: New SR Series - SR-516 Architectural Controller

Our NEW SR Series Features Inexpensive Wall Stations At Every Entry Way. The SR-516 features: In-Line DMX Scene Processor, Remote Wall Station Control and 16 Scenes w/ Fade Times to 99 Minutes. With our NEW inexpensive SR-516 Architectural Controller, adding Remote Wall Station Control to your existing DMX Dimming System has never been easier. The SR-516 provides control of your house and stage lights from multiple locations. Get a Complete System for under \$999.

Additional SR-516 features include: Show Mode Station Lockout via DMX, Emergency Bypass Relay, Retain previous Scenes from Power Off, Non-volatile Scene Memory, Mutually Exclusive Scene Grouping, Last Scene Recall, Record from Live DMX, 3 Configurable Contact Closures, 2 Gang Wall Box Installation.

Visit our website at www.lightronics.com or call 800-472-8541 for detailed information about the NEW SR-516 and what it can do for you. Let us be a part of your next Lighting Control Solution.
