		Weight:	0.25 pounds

### Architect & Engineer's Specifications

The APP01 is a wall mounted, 2 scene, simple remote for use with the Lightronics AR-1202RTC architectural dimmer. It uses low voltage wiring and communicates with the AR-1202RTC over a 3 conductor cable. The APP01 can access two scenes which are created and stored in the AR-1202RTC dimmer. A "blackout" scene is also available. Scene activation is accomplished by providing a momentary switch closure to specific contacts on a terminal strip in the AR-1202RTC dimmer. No setup or power source is needed. The unit can be installed in a single gang wall switch box. Multiple units can be used together by connecting them in a parallel fashion or by connection to different scene combinations.

Dimensions: 1.25"W x 4"H x 1.125"D, Weight: 0.25 Pounds.

The unit shall be the Lightronics APP01.

### 5 YEAR WARRANTY

The 5 year warranty is valid if the Warranty Registration card is returned to Lightronics, Inc. within 30 DAYS of the purchase date.
