TL Series

The TL Series Consoles are perfect for all users, from the beginner to experienced lighting techs. The lighting consoles include 12, 16, 24, 32, and 48 channel models with scene availability from 8 to 1200. All models feature user programmable chase patterns and dipless cross fade. The consoles are equipped with bump buttons for instant "on" features. The more advanced consoles include cue lists and a Built In Wireless DMX option. Some models also feature sound activated chase operation and softpatch with multiple pages. The TL Series consoles are lightweight, rugged, and dependable. They can be utilized in a wide variety of applications within theatres. All Lightronics registered products are covered by a FIVE-year warranty and lifetime technical support.
