

LIGHTRONICS

LED Ellipsoidal

- Brian
Check out Lightronics'
new LED ellipsoidal while
you're at WFX. I saw it in
a shootout and it's the
brightest. Great price!

Dimmable LED Ellipsoidal

Incredibly bright and energy efficient our new LED Ellipsoidal outshines the competition. Our LED Ellipsoidal generates over 7000 lumens while consuming just 150 Watts of electricity, providing 47 lumens per Watt. Try to find a spec that beats that. The 120 Watt LED array is rated for a 100,000 hour life span, twice that of most other brands. Best of all, our affordable price leaves the others in the dark. Come see for yourself the light that will change the way you think about LEDs. Visit us at www.lightronics.com to learn more.
